Education

Cleveland State University (2012 - 2016)

- *Bachelor of Science in Computer and Information Science*
- Senior Project: Implemented a classroom clicker web app using Python, Flask, Bootstrap and SQLite. The project was a semester long, team effort between myself and another group member. I handled the coding while the other member handled the documentation.

Experience

JBT Corporation (summer 2015, IT intern)

- setup user computers according to company standards
- assisted users with computer related issues.
- wrote several utility programs to help users automate various tasks
- worked with another intern to develop custom content management solution leveraging Microsoft SharePoint, the .NET framework, as well as HTML/CSS/JavaScript

Independent Projects

- static site generator that currently generates my personal website.
- chrome extension that tracks which episode of a series you are on
- clone of the arcade game "Breakout" using Python and Pygame
- code is available at: github.com/Oisota

Cedar Point Marina (summer 2014, dock attendant)

- assistance of boaters with docking, fueling up, and waste tank pump outs
- general upkeep of marina grounds

Kalahari Convention Center (summer 2013, houseman)

- event setup and general assistance of guests

Willoway Nursery Inc. (summer 2012, production worker)

- greenhouse production line work meeting production quota standards
